

United Insulated Structures Corp.

CLIENT:

The Crown Group
Huntington Plaza
Hoffman Estates, Illinois

PROJECT GOAL:

To provide all design, engineering and construction for the development of a 33,000 square foot, one-story Retail Shopping Center along with a 122,000 square foot parking lot. A second phase included the construction of a 23,000 square foot Ace Hardware store, a mezzanine area and a covered canopy area.

COMMENTARY:

The Huntington Plaza Shopping Center and adjacent parking lot were built during two phases of a construction plan. UISC served as contractor for both Phase I and II. The one-story, steel framed building features both masonry and glass facades with decorative glass towers. UISC's experienced team supervised all labor and material for subcontract work and completed all general conditions work with its own forces.

The entire project, including design, permit process and construction was completed within eight months of contract award. The contract with The Crown Group obtained savings for both design costs and buyout costs through the efforts of UISC.
